The following post lists essential features of Photoshop Elements that you can use to create new high quality images, edit, or both. Adobe Photoshop Elements has 10 exclusive editing tools for images. Some of them are described in detail on [PhotoshopLearning.com](https://www.photoshoplearning.com) and on our previous posts. These tools use image information like color, brightness, contrast and sometimes even the shape of objects to improve overall image quality. Let's see what features you need to work with to create new images in Photoshop Elements.

Add an image layer The first thing you need to do is add an image layer. To add a layer with a photo from your computer's Hard Drive, go to Layers > New > Layer from File. To add a new layer with a photo you've loaded into Photoshop Elements, go to Layer > New > Layer From Photo. Paste the photo you want to add to the new layer, and press OK.

Add text Open an image you want to edit. Go to Layers > New > Text. Use the Type tool to select the text you want to add. Use the options on the top bar to type the text. Use the Type tool to select the Text tool. Click and drag to move the text and resize the text, or click and hold and draw a line around the text to resize the text. To move an image or an object, choose Select > Select > Same. To select multiple objects, hold down the Ctrl key and click. To create or select a text layer, drag a text tool onto your canvas, and then drop the tool in a position you want. To deselect all the objects on the canvas, go to View > Freeze Panels. To add a Gradient Map, use the leftmost icon to create a blank canvas or copy an existing gradation map. Drag a gradient band tool from the tool bar onto the blank canvas. Let's take a look at how to draw a gradient on the canvas in Photoshop Elements. To create a vertical gradient, drag a gradient bar anywhere on the blank canvas. Then drag the gradient bar left or right on the canvas to move the gradient inside the gradient bar. To create a horizontal gradient, drag a gradient bar left or right across the canvas and the gradient bar will change size. Drag the gradient bar up or 388ed7b0c7

Q: How can I scrape data from this website? It has tags, tags, and tags inside a tags with the id ~\$content. How would you extract the text from each link using BeautifulSoup or would I use Regex?

A: In order to extract the text from the tags we could use something like this: `import requests url = "r = requests.get(url) data = r.content from bs4 import BeautifulSoup soup = BeautifulSoup(data, 'html.parser') for link in soup.select('a'): print (link.get_text())` We can also use the below selector to find the contents of each div: `# you can also find the div tags in below given selector soup.select('div#$content')` To date, the industry of programmable logic devices (PLDs) has made remarkable progress. A variety of circuitry having differing functions can be arranged on a single chip, allowing for economy in circuit design. PLDs have been fabricated in the form of integrated circuit chips to be mounted in an "off the shelf" manner onto a circuit board along with other circuit components. PLDs are typically programmable so as to allow one designer to employ multiple designs as building blocks for a number of circuit types. As an example, a field programmable gate array (FPGA) typically comprises a plurality of configurable logic blocks which may be constructed to perform a wide variety of functions. A considerable advance in the art of such FPGAs is the ability to design and customize an FPGA by simply providing the FPGA manufacturer with the bit patterns required to configure the FPGA. In a bitstream configuration, the user is able to select from among a variety of available structures that could be synthesized, e.g., implemented on an FPGA. Unfortunately, as the number of configurable structures expands, the number of lines of configuration code required to specify such structures can become unacceptably lengthy for real-time, on-chip use. The ability to save space on a chip by physically grouping blocks together to be operated upon in parallel is known in the art. For example, many binary add

BANGKOK — A Thai official today called for a university student who has been on hunger strike since protesting against the ruling party to end it now, adding, though, that she is unlikely to relent. The statement by the minister for public health, Anutin Charnvirakul, came two days after Prime Minister Prayuth Chan-ocha called on Preecha Chan, who has been fasting for 10 days in front of the government headquarters in Bangkok, to end the strike. Here is the full statement, as released by the health ministry. The ministry and Mr. Prayuth have not responded to repeated requests for an interview: "After the chief of the military government, Gen. Prayuth Chan-ocha, addressed the hunger striker, Ms. Preecha Chan, on Feb. 10, in order to end her protest and get better, we wish to once again bring up the issue of her fasting, as we are concerned about her health. As her condition cannot be addressed in a short time, and as she does not have a clear plan, we urge her to end the hunger strike as soon as possible. "Ms. Preecha Chan started to fast on Feb. 6. Her health is not good and she has lost consciousness at some times. Her condition has worsened. The chief of the military government urged her to end her hunger strike on Feb. 10 so that her health can be restored. "If Ms. Preecha Chan hopes to improve her health, she should end her hunger strike now, as we have urged her to. "Ms. Preecha Chan is a university student, and she has not planned what she will do after the protest. This is something that we will consider. If she does not want to end the hunger strike and has no clear idea of what she will do after the protest, we will try to arrange for her to enter or graduate from university. "We also hope that her means of protest will be modified so that it does not affect other people. "We are worried about her health, and wish to think about her situation and comfort her." We are concerned about her health. Wish to think about her situation and comfort her. We are worried about her health, and wish to think about her situation and comfort her. Ms. Preecha Chan has not touched food or water since Feb. 6
