Well it's certainly been around long enough to become a 'Classic' and have its price lowered to \$9.99 which is pretty nice. It comes with a nice selection of liveries ranging from the early days of BR Green up to EWS and NSE with the loco coming in separate versions 33V0 and 33V1. Despite coming out in 2012 it still looks good with decent sounds and cab/panel lights with strong scenario making potential thanks to the various versions and schemes. Also included is the Sea Lion ballast wagons.

For the serious Class 33 fans Armstrong Powerhouse has a Class 33 sound pack to replace the currently dated sounds.

I have come across an annoying problem and involves the throttle and brakes not responding to keyboard commands when the Class 33 is set to go to Faversham on the London-Faversham route in scenario maker. Even if Faversham is removed as a stop or destination the problem remains and the only fix so far is to restart building the scenario from scratch and avoid using Faversham.. [>100h offline]

Wonderful.

If you like simple games, relaxing, management never too stressful but peaceful, this is the game for you. Even if in alpha, there is so much to do and so many items to unlock that it seems complete already.

Also, the developers are very responsive and passionate.

We want more dev and games like this!!

. YO HONDA RC213V-S IS HERE, OP BIKE IS HERE. If you love retro styled games, and quirky humor, get Luke Sidewalker!

In this game you make your way through the crowds to face a unique stage boss the end of every level.

With easy to obtain achievements and trading cards, it is worth picking this game up for less than a dollar.

Heck, get the Bros Bundle to get all their games!! Don't buy these skins unless you're getting the season pass because they aren't worth 5 bucks and you can't use them until you have beat the main story.

This game needs some optimizations before it leaves early access. I was generally getting around 17 fps with a GTX 1080 and then theres these explosions which seem to come from nowhere on the first level. the second level and so on were a bit better.. This is a good warhammer game with terrible marketing.

It was a mistake by the gamer community to label this as "Diablo in space", this game has nothing in common with Diablo. And if you are going in knowing this you will have fun. Give it a try, at least when on sale.

Audio - great

Visuals - great

Story - interesting

Combat - satisfying

Warhammer atmosphere - great. Good game BUT when ever I play it it will not let me out of level 1 after the boss is dead if it lets me get that far. the developers need to fix this game to make it better.. GET IT. PLAY IT. MASTER THE SAND.

This is one of those games where you play awhile, then get stumped and quit, come back a few weeks later, try again, and etc. The replayability is high as well since it's difficult to find all the secrets the first time around. Extremely worth the \$1 on sale.. It is a free DLC. Can you ask for more ? .....
